

Sprint retrospective, Iteration #1

Project HOA

Group 22 a

User story #	Task #	Task assigned to	Estimated effort per task	Actual effort per task	Done	Notes
<i>Every HOA must have an associated country, city and a custom name.</i>	#4	Rares	1h 30 m	1h 30m	Yes.	None.
<i>Every activity on the notice board should require a name, a time, and a short description.</i>	#21	Vian	1h	1h	Yes.	None.
<i>Every HOA should have a public notice board.</i>	#18	Rares	2h	2h	Yes.	None.
<i>The user must be able to create a new HOA or join an existing one.</i>	#3	Vian, Rares	2h	2h	Yes.	None.
<i>All members should be able to show interest in given activities that they wish to participate in by selecting Interested/Going.</i>	#23	Vian	2h	2h	Yes.	None.
<i>Any member of the HOA should be able to publish activities.</i>	#19	Rares,Vian	6h	5h	Yes.	None

<i>Authenticate all member methods; store password securely; extract the authentication code so it can be used in HOA</i>	#30	Michal	5h	2h	No	None.
<i>Users should be able to register and change passwords</i>	#1	Hubert	1.5h	1h	Yes	None.
<i>Users should be able to join and leave HOAs</i>	#31, #6	Hubert	3h	4h	Yes	Required additional fiddling with active membership logic. Only members on my side.
<i>($\frac{2}{3}$) Implement election microservice boilerplate</i>	#29	Atanas				
<i>($\frac{1}{3}$) Implement election microservice boilerplate</i>	#29	Alpi	~2 hrs	2hrs 51min	Yes ($\frac{1}{3}$)	None

Main Problems Encountered

Problem 1

Description: I (Rares) noticed that I had many commits for just adjusting the pipeline because pmd checks failed.

Reaction: I now run checkstyle carefully so I don't miss anything before committing, so I will not need to make further commits for fixing this. Likewise, I run pmdMain and pmdTest as Gradle tasks, before committing.

Adjustments for the next Sprint Plan

We will need to decide how we will switch our roles for the next sprint.
