

Meeting 4 - 15/12/2022

Chairman: Rares Notetaker: Alpi

#### *Assignment feedback*

- Make sure you include bounding boxes for the microservices
- The rest looks good enough

#### *Misc. GitLab stuff*

- Issue board do be buussin'
- **Upload the sprint retrospects on Git**

#### *Code*

- Add more guard clauses for security reasons
  - Type checks
  - Pattern match
  - Domain checks
  - Empty fetches
  - Non-permitted operations
  - Revert the AvoidStarImport checkstyle rule
  - etc.
- Testing
  - Make sure you have all types of tests (Unit, integration, system, boundary tests)

#### *Design patterns*

- Add chain of responsibility
- Already have an adapter and facade/proxy
- Make sure to provide one "fancy" pattern on top of the "boring" ones
- Singleton should not be considered for the util services
