Meeting 3 – 08/12/2022

Chairman: Rares

Notetaker: Vian

Draft Report Feedback

- Final part should be refactored a bit
- Some parts could be left out
- Include bounded context diagram and context map diagram
- Include database tags in the component UML
- Include unused interfaces
- Arrows can stay
- Add boxes for the microservices
- Boxes should have a label
- Add argumentation for combining microservices (use the fact that they are core, generic)
- Don't need to talk about upstream/downstream
- Deadline next Friday at 5pm
- Use gitlab tags for the design patterns

Sprint Feedback

- Good
- Change done issues to not done if the issue is 1/3 done

Design Patterns

- ParticipantsConverter can be considered a design pattern (Adapter)
- Implement a Chain of Responsibility design pattern
- In the report we can include screenshots when talking about an implemented design pattern

General

- Storing on disk is not required
- Facade design pattern when implementing communication between microservices
- Activities expire after they started
- Unit tests, integration tests, functional testing(user testing, diagram, test functionality)
- Mutation testing later
